

## **CHOICES OCCUPATIONS MATCHED TO CAREER CLUSTERS**

This document matches all occupations in CHOICES PLANNER to the 16 Career Clusters. It can be used by 8<sup>th</sup> graders and educators in the Winter/Spring of 2007 to identify the career clusters that match the careers in which they are most interested. This extra step will no longer be needed in CHOICES PLANNER by August, 2007 as CHOICES will list the Career Cluster on each occupational report. New features in FACTS.org, available in April, will ask students to identify their career cluster which will be matched to sample programs of study for high school.

After completing the interest assessment and exploring careers in CHOICES PLANNER, students should save the three careers in which they are most interested in their portfolio. Next, use this resource to match the careers with the career cluster. You will then use the career cluster in which you are most interested when you build your ePEP in FACTS.org.
